

BACKFILL FOR SUBSURFACE STRUCTURES

		<i>Paragraph</i>	<i>Page</i>
CHAPTER	1.	INTRODUCTION	
		Background	1-1 1-1
		Purpose and scope	1-2 1-1
	2.	PLANNING AND DESIGN OF STRUCTURES AND EX- CAVATIONS TO ACCOMMODATE BACKFILL OPERATIONS	
		General	2-1 2-1
		Effect of excavation and structural configuration on back- fill operations	2-2 2-1
		Backfill problem areas	2-3 2-4
		Instrumentation	2-4 2-9
		Optimum cost construction	2-5 2-9
	3.	EVALUATION, DESIGN, AND PROCESSING OF BACKFILL MATERIALS	
		General	3-1 3-1
		Evaluation of backfill materials	3-2 3-1
		Selection of backfill materials	3-3 3-4
		Processing of backfill materials	3-4 3-7
	4.	EARTHWORK: EXCAVATION AND PREPARATION FOR FOUNDATIONS	
		Excavation	4-1 4-1
		Foundation preparation	4-2 4-2
	5.	BACKFILL OPERATIONS	
		Placement of backfill	5-1 5-1
		Installation of instruments	5-2 5-4
		Postconstruction distress	5-3 5-5
	6.	SPECIFICATION PROVISIONS	
		General	6-1 6-1
		Excavation	6-2 6-1
		Foundation preparation	6-3 6-2
		Backfill operations	6-4 6-2
	7.	CONSTRUCTION CONTROL	
		General	7-1 7-1
		Corps acceptance control organization	7-2 7-1
		Excavation control techniques	7-3 7-3
		Foundation preparation control techniques	7-4 7-3
		Backfill quality acceptance control	7-5 7-3
APPENDIX	A.	REFERENCES	A-1
	B.	FUNDAMENTALS OF COMPACTION, FIELD COMPACTION TEST METHODS, AND FIELD MOISTURE-DENSITY TEST METHODS	B-1
	C.	BIBLIOGRAPHY	C-1

LIST OF FIGURES

<i>Number</i>	<i>Title</i>
2-1	Open backfill zones
2-2	Confined backfill zones
2-3	Complex structures
2-4	Excavation subject to bottom heave
2-5	Excess lateral pressure against vertical walls induced by compaction
7-1	Acceptance rejection scheme for a backfill area
B-1	Compaction Curve
B-2	Typical compaction test curves

*This manual supersedes TM 5-818-4/AFM 88-5, Chapter 5, 7 June 1968.

<i>Number</i>	<i>Title</i>
B-3	Molding Water content versus density-lean clay (laboratory impact compaction)
B-4	Illustration of one-point compaction method
B-5	Illustration of possible error using one- and two-point compaction methods
B-6	Illustration of two-point compaction method
B-7	Correlation between dry density and hand cone resistance at a depth of 6 inches below the surface
B-8	Power applied by the oven to dry moist soils

LIST OF TABLES

<i>Number</i>	<i>Title</i>
3-1	Typical engineering properties of compacted materials
5-1	Summary of compaction criteria
